

## 5 Steps to Better Lawn Care

---

### 5 Steps to Better Lawn Care

EARLY SPRING	Repair winter damage. Treat with pre-emergence crabgrass killer, insecticides; fertilize and reseed if necessary.
LATE SPRING	Kill broadleaf weeds; fertilize lawn and flowers.
EARLY SUMMER	Water generously and often; fertilize and apply post-emergence herbicides and insecticides as needed.
LATE SUMMER	Watch for sod webworms and other insects. Fertilize and water heavily.
EARLY FALL	Seed and fertilize, prepare for winter by mulching and pruning various shrubs and trees
